

EKASIL

Rice Husk Silicon Dioxide

Rice Husk Silica

EKASIL Rice Husk Silica is a sustainable and eco-friendly silicon dioxide product obtained from rice husk through specially designed technology that enables high-purity production with a silica content of up to 99.99%. Unlike typical silica sourced from sand, EKASIL rice husk silica is an environmentally friendly product. It is obtained via waste utilization in a nonpolluting, low-energy-consuming manufacturing process. Thanks to controlled production, the products can be customized with various physico-characteristic properties to match customers' specific requests, if any. EKASIL rice husk silica is a green and efficient utilization of waste with outstanding purity, making it an excellent choice for environmentally conscious individuals and companies.

Eco friendly

amorphous silica obtained from rice husk

Customizable

physico-chemical properties for different applications

High purity

up to 99.99% with stable specification

PR & Marketing

for adopting environmentally friendly products

Compettitive price

compared to silicon dioxide of the same spec in the market

Wide range

of applications across different industries

EKASIL Advance

As advanced as the name suggests, EKASIL Advance is the rice husk silica product line that is developed further for advanced and specialized applications in specific industries. Below is the list of products in the EKASIL Advance category.

No	EKASIL Advance	Special Application
1	EKASIL Oil Sorbent	Oil sorbent
2	EKASIL U80	Tyre and mechanical rubber goods
3	EKASIL U110	Tyre and mechanical rubber goods
4	EKASIL U160	Tyre and mechanical rubber goods
5	EKASIL AntiTox	Animal feed additives
6	EKASIL AntiTox Extra	Animal feed additives
7	EKASIL Active	Animal feed additives
8	EKASIL Free Flow	Animal feed additives
10	EKASIL 10	Beer stabilizer
11	EKASIL 40	Beer stabilizer
12	EKASIL 60	Beer stabilizer
13	EKASIL Phyto-A	Agrochemicals
14	EKASIL Phyto-B	Agrochemicals
15	EKASIL Phyto-C	Agrochemicals
